ФГАОУ ВО «СЕВАСТОПОЛЬСКИЙ ГОСУДАРСТВЕННЫЙ УНИВЕРСИТЕТ»

Институт информационных технологий

ОТЧЕТ

о выполнении лабораторной работы №5
«Исследование возможностей ускорения
разработки клиентских приложений с
использованием SASS»
по дисциплине
«Веб-технологии»

Выполнил:

ст.гр. ИС/б-23-1-о

Баймурадов Т. Р.

Севастополь, 2025

1. Цель

Исследовать влияние препроцессоров на разработку клиентских приложений. Изучить возможности метаязыка SASS для упрощения разработки файлов каскадных таблиц стилей. Приобрести практические навыки использования SASS/SCSS при реализации веб-страниц.

2. Постановка задания

В процессе выполнения лабораторной работы необходимо реализовать файл стилей заданного вариантом задания раздела сайта с использованием SASS/SCSS. Необходимо использовать возможности языка, указанные в таблице 6.1.

Вариант №13: Scss; администратора; Переменные, операторы, примеси, заполнения.

Используя результаты работ, выполненных ранее, модифицировать файл стилей заданного вариантом задания раздела сайта с использованием SASS/SCSS.

3. Ход работы

Код на SCSS и CSS представлен в Приложении А.

Для выполнения задания взят исходный CSS, написанный в предыдущих работах, и произведен рефакторинг на SCSS. На рисунках 1 - 5 представлены скриншоты страниц со скомпилированным SCSS в CSS.

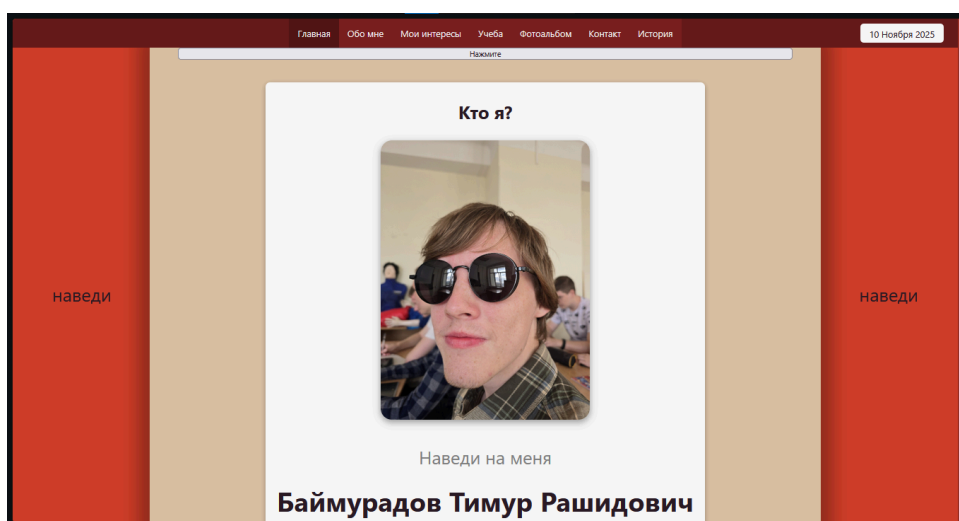

Рисунок 1 – Главная страница

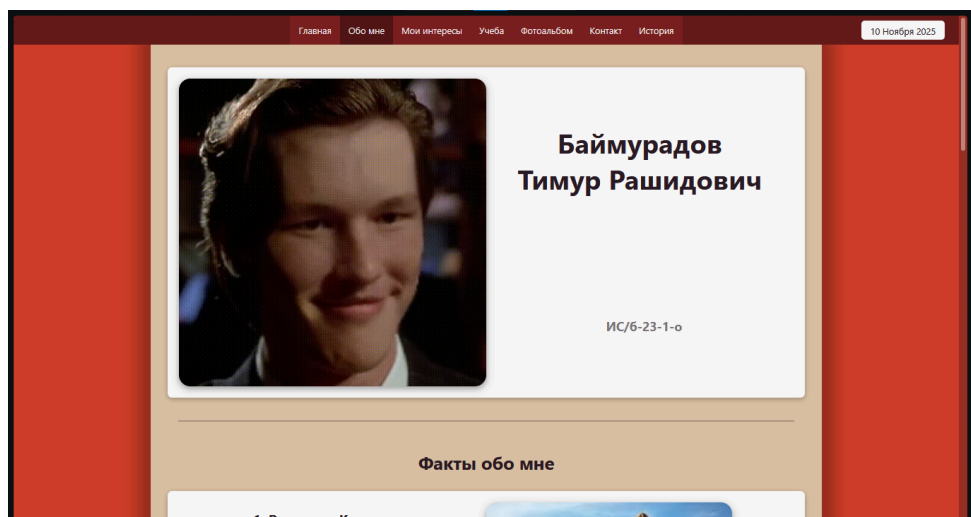

Рисунок 2 – Обо мне

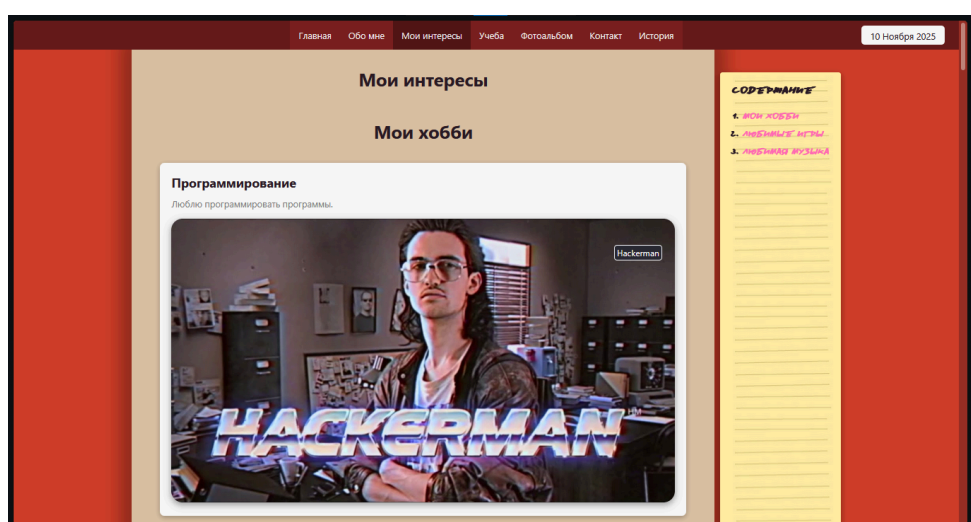

Рисунок 3 – Мои интересы

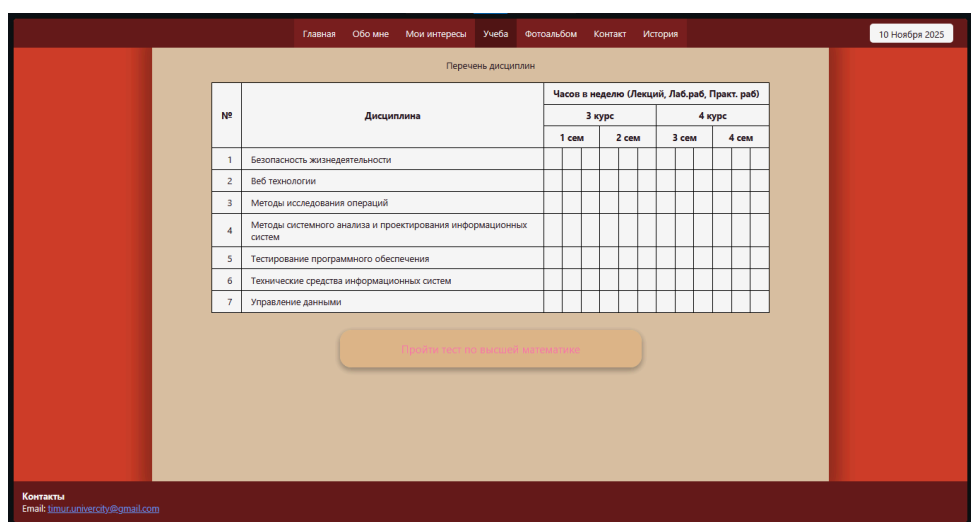

Рисунок 4 – Учеба

Весь код CSS преобразован в SCSS. Использована вложенность селекторов для улучшения читаемости. Используются примеси и заполнения для переиспользования повторяющихся свойств.

ПРИЛОЖЕНИЕ А

Листинг 1 – Файл style.scss
